VADIM TECHNICAL SERVICES

A Unit of Vadim Infrastructure Pvt. Ltd.

...Service with commitment...

Prologue

VADIM TECHNICAL SERVICES is a professionally managed Engineering consultancy, Procurement & Construction organization.

It is a unit of VADIM INFRASTRUCTURE PVT. LTD. having 10+ year old Engineering & Construction company services to power, industrial and infrastructure and an impressive track record of over 101 successfully completed and 19+ on-going assignments.

VISION

To excel in scientific, technological and mechanical services using indigenous pool of engineering talent to establish our company and ultimately aid the overall growth of the society we live in.

MISSION

Having the necessary expertise and infrastructure to provide quality service to our customers, we look ahead to improve and innovate to strengthen our performance gradually.

Energy Management System

Power factor correction, Harmonics Solution product and Roof-top Solar Solution are some of the core ideas that we have been working on significantly for productive energy management.

The service extends to installation, operation and maintenance of Energy savers for Lighting & Mixed Load applications, Electrical Control & Distribution Panels and LED Lightings, UPS, Battery, Battery Charger, LT/HT Electrical Panel & Board.

Testing Services

We have the potential and needed resources to provide testing and commissioning, preventive maintenance of all undertaken projects that include infrastructures, industries, power plants and others in an effective manner.

Skill Development & Training (E & I)

Electronics & Instrumentation is a closely related branch to our services. Hence, we also take-in and offer training and on-field experience to fresh ITI, Diploma & Engineering graduates to enhance their practical knowledge and skill development.

Deputation of Technical Manpower

We provide skilled and experienced manpower on deputation basis for various projects that require technical services.

TRADING

- Electrical Equipment & Light Poles
- All Type of Industrial Pumps
- All Range Motors
- Process Measurement Instruments
